Afterword	13

INTRODUCTION

This paper addresses the need for a more aggregate perspective on the allocation of \$29 million of federal funds channeled to the City of Boston through the Community Development Block Grant Program for the 1978 fiscal year.

The CDBG budget is broken into five major program areas of housing, neighborhood business districts, human services, capital improvements and urban renewal. In addition, there are centralized allocations for planning, administration, and contingency requirements. A description of each of these program categories is contained in the "Neighborhood Improvement Program 1977 Program Summary" available at the City of Boston Office of Program Development.

An effort is made in this report to provide information on the CDBG budget by program and by neighborhood in a straight forward analytical framework without attempting to review the criteria for fund allocation.

The sources of the CDBG budget figures are the Neighborhood Improvement Programs for the City of Boston, 1975, 1976, and 1977:

- 1) Program Summary
- 2) Program Budget by Neighborhood
- 3) April 15, 1977 Application for Federal Assistance

These base figures have been adapted to fit the analytical framework of this report.

THE CDBG PROGRAM BUDGET IN
HISTORICAL PERSPECTIVE
1975, 1976, 1977

(Current Dollars)

	<u>1975</u>	<u>1976</u>	<u>1977</u>
Total Program	\$32,108,000	\$30,550,000	\$28,993,000
Housing	9,020,000	9,196,000	7,475,992

West Roxbury	2.1	5.6	2.8
City Total	100.0	100.0	100.0

* Fair Share distribution is based upon the Federal Community Development Block Grant Formula. Each neighborhood's share is equal to the average of their shares of total population, overcrowded housing and families below the poverty level counted twice.

Afterword

A similar analysis to that contained in this paper was completed in 1975. At that time, concerns were raised as to the legitimacy of analyzing a single year's community development allocation without an understanding of several years' funding. This paper, by covering three years with a focus on 1977 in particular, attempts to assuage that concern.

In addition, however, there are admitted drawbacks to applying a comparative formula distribution to that of the actual allocation, such as:

- 1) projects which are created in one neighborhood but which serve a city-wide need;
- 2) numerous other criteria which the CDBG formula does not presently contain; and
- 3) the "lumpy" nature of project investments.

Despite such qualifications, there remains a need to examine the CDBG budget in a concise program and neighborhood framework, otherwise not provided in City CDBG publications.
